- To help you learn how to collaborate on reading assignments

3. Which statements about the Survey step are true?

14 points

- One goal of surveying is to give you an idea of how the information is organized.
- One goal of surveying is to help you understand the details of the text.
- When you survey, you skim the introduction and summary sections.
- When you survey, you skim any pictures and graphs and their captions.

4. Which statements about the Question step are true?

14 points

- Think about the headings in the informational text, and turn those into questions you would like to find answers to when you read.
- The more questions you come up with, the more likely you are to remember what you read.
- Your teacher or librarian will provide the questions that you should answer.
- Ask yourself what you already know about the topic, and think about that in order to help your brain connect old and new information.

5. Which statements about the Read step are true?

14 points

- You should completely read each source from beginning to end.
- Remind yourself of the questions you came up with before you read each section.
- Pay attention to main ideas and major points.
- You must read out loud to remember all of the information.

6. Which statements about the Record step are true?

14 points

- To record is the same as taking notes.
- Writing down important information should help you remember it.
- Notes should be very detailed; the longer your notes, the more you will probably remember.
- Write down information like explanations and facts plus answers to your questions.

7. Which statement about the Recite step is true?

10 points

- To recite means to memorize.
- First take notes for everything you have to read, and then recite all of your notes.
- Reciting your notes helps you connect and remember information.
- There is no need to recite your notes.

8. Which statements about the Review step are true?

14 points

- ✓ Reviewing is a way of checking your understanding of what you have read.
- ✓ One way of reviewing is to try to answer the questions you wrote down without looking at your notes. Then verify by rereading your notes or the text.
- ✓ To be most effective, review one section at a time instead of trying to review all of your reading or questions at once.
- You should only review right before a test.
